List of Participants xiii
Preface xvii

Inner Ear Cell Biology

Neurobiology of cochlear hair cells - *Invited tutorial*
P Dallos 3

Two control systems for the outer hair cell motor
J F Ashmore, G D Housley and P J Kolston 19

The cortical cytoskeleton and cell shape changes in mammalian outer hair cells
M C Holley and B Kachar 27

Stochastic theory of outer hair cell electromotility
P Dallos, R Hallworth and B N Evans 35

Correlation between the length of outer hair cells and the frequency coding of the cochlea
R Pujol, M Lenoir, S Ladrech, F Tribillac and G Rebillard 45

Evidence for voltage sensitive Ca^{2+} channels in supporting cells of the organ of Corti: characterisation by indo-1 fluorescence
R Moataz, T Saito and D Dulon 53

Contribution of K^+ channels to solute exit from endolymph-secreting dark cells
D C Marcus, S Takeuchi and Ph Wangemann 61

Auditory Periphery Functioning

Cochlear mechanics - *Invited tutorial*
J P Wilson 71

Basilar membrane responses to clicks
M A Ruggero, N C Rich and A Recio 85

On mechanical excitation of hair cell stereocilia in the cochlea
E de Boer 93

Scanning electron microscopy of the echidna: morphology of a primitive mammalian cochlea
J O Pickles 101

Pressure measurements in the fish lateral line
J Th P W van Maarseveen and H Duifhuis 109

Basal turn hair cell activity dominates the round window recorded simple difference tone (F_2-F_1)
A L Nuttall and D F Dolan 117

A third-order nonlinear oscillator model for spontaneous otoacoustic emissions
H P Wit 125

Statistics of and physiological mechanisms for self exciting point process models of auditory nerve discharge
M I Miller, T Lin, K Mark, J Wang, W R Bosch and A T Ogielski 133

Self stimulation of the tympanic membrane in the frog
P M Narins 141

Frequency Selectivity

A quantitative comparison of peripheral tuning measures: primary afferent tuning curves versus suppression tuning curves of spontaneous and distortion-product otoacoustic emissions
G A Manley and C Köppl 151

Comparisons of physiological and behavioural properties: auditory frequency selectivity
E F Evans, S R Pratt, H Spenner and N P Cooper 159

Characterizing changes in auditory filter bandwidth as a function of level
S Rosen, R J Baker and S Kramer 171

Auditory filters and aging: filters when audiometric thresholds are normal
R W Peters and B C J Moore 179

Cochlear nonlinearity for complex stimuli
A J Breed, L J Kanis and E de Boer 189

Normal tuning curves for primary afferent fibres innervating short and intermediate hair cells in the pigeon ear
J W T Smolders, D Ding and R Klinke 197

Pitch

The musical pitch of high frequency tones
K Ohgushi and T Hatoh 207

The pitch of anharmonic comb filtered noise reconsidered
J Raatgever and F A Bilsen 215

Pitch of dichotic complex tones with a mistuned frequency component
C J Darwin, A Buffa, D Williams and V Ciocca 223

Cochlear nerve and cochlear nucleus responses to the fundamental frequency of voiced speech sounds and harmonic complex tones
A R Palmer and I M Winter 231

Tonotopy and periodotopy in the auditory midbrain of cat and guinea fowl
G Langner, C Schreiner and M Albert 241

Intensity Coding

Neural encoding of sound intensity in the ventral cochlear nucleus of awake and behaving cats
B J May and M B Sachs 251

The coding of intensity in the inferior colliculus: onset and sustained responses
A Rees 263

Some experiments relating to the overshoot effect
R P Carlyon and L J White 271

Possible relation of auditory nerve adaptation to slow improvement in level discrimination with increasing duration
S Buus and M Florentine 279

On the relation between intensity discrimination and adaptation
B Scharf, G Canévet and L M Ward 289

Involvement of medial olivo-cochlear system in loudness adaptation
L Collet, E Veuillet, C Micheyl, J C Amabile and A Morgon 297

Memory for loudness: the role of loudness contour
M-C Botte, C Baruch and S Mönikheim 305

Temporal Analyses

Real time coding of complex sounds in the auditory nerve
F Rieke, W Yamada, K Moortgat, E R Lewis and W Bialek 315

Physiological correlates of temporal integration
N F Viemeister, B G Shivapuja and A Recio 323

Fluctuation strength of narrow band noise
H Fastl 331

The effects of level uncertainty on the detection of a tone added to narrow bands of noise
V M Richards 337

Discrimination of converging and diverging frequency transitions
L L Elliott, M A Hammer and T Carrell 345

The detection of frequency and amplitude modulation in the European starling (*sturnus vulgaris*): psychoacoustics and neurophysiology
G M Klump and U Langemann 353

Spectral Shape Analysis

Spectral shape discrimination of two-tone complexes
N J Versfeld and A J M Houtsma 363

Discrimination of complex spectra: spectral weights and performance efficiency
B G Berg and D M Green 373

Neural coding of intensity increments added to pure-tone and multi-tone complexes
B G Shivapuja, S S Saunders and R J Salvi 381

Interneurons of the dorsal cochlear nucleus shape the responses of principal cells to complex sounds
G A Spirou, J J Rice and E D Young 389

Spectral gradient columns in primary auditory cortex: physiological and psychoacoustical correlates
S A Shamma, S Vranic and P Wiser 397

Perception of speech sounds by birds
R J Dooling 407

Spectro-temporal Processing

How does physiology support auditory scene analysis? - *Invited tutorial*
A S Bregman 417

Complex sounds and auditory images - *Invited tutorial*
R D Patterson, K Robinson, J Holdsworth, D McKeown, C Zhang and M Allerhand 429

A multi-representation model for auditory processing of sounds
J Holdsworth, J L Schwartz, L Berthommier and R D Patterson 447

Identification of initial stop consonants processed by the Patterson-Holdsworth ASP model
R A Fox and L L Feth 455

Identification and discrimination of stop consonants: formants versus spectral peaks
C W Turner, A R Horwitz and P E Souza 463

Temporal relations in profile comparisons
D M Green and H Dai 471

Comodulation masking release (CMR) and profile analysis: the effect of varying modulation depth
D A Fantini and B C J Moore 479

Auditory image perception and amplitude modulation: frequency and intensity discrimination of individual components for amplitude modulated two-tone complexes
W A Yost 487

An anatomical/physiological approach to auditory selective attention
R Meddis, M Hewitt and T Shackleton 495

Binaural Interactions And Sound Localization

Frequency discrimination, amplitude discrimination and the binaural masking level difference: some anomalous results
G B Henning 507

Binaural critical bands in normal and impaired listeners and their relation to speech intelligibility in noise
B Kollmeier and I Holube 513

Masker envelope fluctuation and binaural masking release
J W Hall III and J H Grose 521

Irregularities in the precedence effect
J Blauert and J-P Col 531

Models of binaural processing based on neural patterns in the medial superior olive
H S Colburn and S K Isabelle 539

The role of consistency of interaural timing over frequency in binaural lateralisation
R M Stern and C Trahiotis 547

Localisation in an echoic environment
E R Hafter, K Saberi, E R Jensen and F Briolle 555

The effect of bandwidth on auditory localization: an estimation theory model
P L Divenyi and P Zakarauskas 563

Differences in masked thresholds between monaural and diotic conditions : influence of contraleral efferent stimulation?
A Kohlrausch and A Langhans 571

Pathologies

Analysis of the relations between evoked otoacoustic emissions and pure tone audiometry
P Avan, P Bonfils, D Loth, M Teyssou and C Menguy 581

Selective glutamate antagonists block the excitotoxicity caused either by glutamate agonists or by ischemia
J-L Puel and R Pujol 589

Effect of short duration acoustic trauma on activity of single neurons in the ventral cochlear nucleus
F A Boettcher and R J Salvi 599

Aberrant temporal discharge patterns in noise damaged guinea-pig cochleas
H Versnel, R Schoonhoven and V F Prijs 607

Modeling the effects of sensorineural hearing loss on auditory perception
L E Humes, W Jesteadt and L W Lee 617

Developmental plasticity of auditory cortex in cochlear hearing loss: physiological and psychophysical findings
R V Harrison, D W Smith, A Nagasawa, S Stanton and R J Mount 625

Binaural click lateralization: evidence from psychophysics and brainstem evoked potentials in normal subjects and multiple sclerosis patients
M Furst, D Algom, M Mohaban and A D Korczyn 635

In Honour of Professor Zwicker
Eberhardt Zwicker - a landmark in auditory science
H Fastl 643

Author Index 649
Subject Index 652
